## **Information exchange**

2012-06-20

**Krakow Municipality receives many interesting proposals and invitations to participate in miscellaneous projects and international programmes. They are often addressed to companies, institutions, schools and associations whereas the scope of proposed cooperation as well as the field of governing principles vary greatly.**

In the Information Exchange section we will publish project invitations as well as any information regarding possible involvement in cooperation with foreign partners.

The information will be published in their original language, as fluent knowledge of a partner's is always the condition for international cooperation.

We would also like to invite Krakow companies, institutions, education centres and organisations to send us information on projects which require participation of international partners.

For more information contact us at [krakow.swiat@um.krakow.pl](mailto:krakow.swiat@um.krakow.pl)
