European Engineering Conference in Krakow

2015-06-19

We held a European Engineering Conference in Krakow, 29 September - 2 October 2014 and it was our first time ever event in the City.

We found the **Krakow Convention Bureau** invaluable both in the planning and the execution stages of the event. Our lead in time for the event was rather short and our site visit was equally tight but the Krakow Convention Bureau were superb in organising an amazing guide who met us on the Sunday and walked us through the City, listening to our programme requirements and delegates needs and ensuring that we saw everything that we needed to. They were a constant source of information and support and ultimately our event in Krakow was one of the most successful of 2014.

We would like to thank the professional, friendly and amazing staff at the Convention Bureau as well as the conference industry at large in Krakow - all of whom were a pleasure to deal with.
