Covid-19 - useful information

2020-03-26

Everyone wants to be up to date in the face of the current epidemic. We have prepared a special edition of the "[Krakow.pl](#)" bi-weekly for those residents of Krakow who do not speak Polish.

We have collected the topics most important for the inhabitants of Krakow in the current situation - such as the functioning of the Krakow City Hall, health care, assistance to the elderly and those in quarantine, education and care for children or public transport. At the end, we also included basic information about the symptoms of coronavirus infection, how to prevent the infection, how the quarantine is to be carried out and what isolation in fact means. We have also listed emergency telephone numbers.

At the same time, we encourage you to have a look at the "[Open Krakow](#)" portal. For the international residents of Krakow the most important information about the situation in the city is posted there on an ongoing basis in English, Ukrainian and Russian.
