What is the song in the city's heart?

2021-02-11

When looking through photos of past journeys, dreaming of future ones, we try to recall the sensual experiences we had in particular cities: their smells, tastes, unforgettable views, the kilometres we walked, and the feeling of being tired afterwards. What if we focused on the sounds in those memories?

After all, music accompanies us wherever we go to in the world. And its particular form - a song - can be the most interesting guide which will show us the true character of the cities we visit. Our new section of the „Kraków the Open City” portal presents romantic, folk or pop songs known to move the hearts of the people in Kraków's partner cities.
