

Kraków against discrimination!

2021-05-31

Krakow is an open city. The municipality demonstrates its openness on gender and equality issues at the level of special programmes, resolutions, creating inclusive and non-exclusive policies.

We are proud to be able to do this - to support all manifestations of openness. As part of the recent "May for Equality" initiative, a series of meetings was held on anti-discrimination and equality issues, the rights of women, people with disabilities, the rights of the LGBT+ community.

The cultural programme was developed in cooperation with municipal institutions, residents' initiatives, NGOs and informal groups, which together sought new fields for dialogue. Combating discrimination and promoting diversity are priorities for multicultural Krakow.

It is worth mentioning that, at Global Conference on the Rights and Inclusion of LGTBI+ youth in Paris Professor Majchrowski spoke together with Justin Trudeau and Anne Hidalgo about the need of special concern for LGBTQI youth.
